GitHub Repository Intelligence Report

Akshyadav07/Ai_Ebook_mysql Analysis Report

Repository Akshyadav07/Ai_Ebook_mysql
Branch main
Generated 10/23/2026, 10:53:26 PM

Executive Summary

12	4	+2,796	-228
Total Commits	Active Contributors	Lines Added	Lines Deleted

This report covers 12 commits by 4 contributor(s) on the "main" branch of the Akshyadav07/Ai_Ebook_mysql repository.

Developer Contributions

Developer	Commits	Lines Added	Lines Deleted
sarahc	3	+546	-57
alexr	3	+648	-57
elenar	3	+750	-57
marcusv	3	+852	-57

Note: Commit counts and line statistics are derived from GitHub API data and may differ from local git history due to squash merges, rebases, and pagination limits.

Commit Type Distribution

Commit Type	Count	Percentage
feature	3	25%
bug fix	2	17%
refactor	2	17%
unknown	2	17%
documentation	1	8%
test	1	8%
maintenance	1	8%

Commit types are inferred from commit message patterns and should be treated as approximate classifications.

Most Frequently Modified Files

File	Changes	Contributors
src/modules/feature_1.ts	12	sarahc

Risk & Bug Analysis Findings

No risk findings detected in the analyzed commits.

Collaboration & Overlap Insights

No collaboration overlap findings detected in the analyzed commits.

Methodology & Limitations

This report was generated by GitScope AI using the GitHub REST API. Analysis is limited to the commits and file patches available within the selected date range and API rate limits.

Limitations:
• Commit statistics reflect what was retrievable via the GitHub API at the time of generation.
• Risk findings use deterministic heuristics and may produce false positives. All findings require human review.
• Collaboration findings identify potential overlaps based on file paths and line ranges; they do not indicate conflicts or errors.
• Large repositories may have incomplete coverage due to API pagination limits.
